Rensselaer Polytechnic Institute
– Troy, NY
August 2022 – Present

Bachelor of Science
Electrical Engineering
Expected in May 2026

Clarkstown North Senior High School
– New City, NY
September 2018 – June 2022
Diploma w/Academic Excellence

-Member of National Honors Society
(2020-2022)
-Member of Science Honors Society
(2020-2022)
-Rensselaer Medalist Award Recipient
(2021)
-Harry Frei Scholarship Recipient
(2022)
-FIRST Robotics – State Champions
(2019-2022)

HOBBIES & SKILLS

- 3D printing/laser cutting
- camping
- hunting/fishing
- DIY electronics
- Arduino and circuitry
- Problem solving
- Programming
- CAD
- Computers

SUMMARY

I am currently pursuing a degree in Electrical Engineering at Rensselaer Polytechnic Institute (RPI) in Troy, NY. While I may be an engineering student, I have got more than just theoretical knowledge under my belt. I am no stranger to hands on work, whether it is landscaping or tackling DIY projects around the house from wiring and plumbing to sheet-rocking and painting.

In High School I was an integral part of the robotics team, and our team reached the World Championship of the FIRST Robotics Competition in 2022 - during my senior year in high school.

My journey has been marked by achievements like earning the prestigious Rensselaer Medalist Award through my involvement in the Science Honors Society. I also received the Harry Frei Scholarship for my interpretation of the significance of Memorial Day through my local Veterans Memorial Association.

What makes me stand out is my unwavering work ethic, determination and never give up attitude. I thrive on challenges, I never shy away from hard work, and I always strive to give my absolute best in everything I do.

WORK EXPERIENCE

Engineering & Data Solutions (EDS) ----- June '24 – Aug '24
Engineering Assistant

- Assist engineers in fiber optic cable route development & engineering for Verizon's Fios program, New York City.
- Involved in surveying & developing cable topography covering the placement of fiber optic cable throughout New York City as needed to access residential & commercial properties.
- Responsible for survey & drawing preparation for Chief Engineer

Ferrite Prints ----- 2020 – Present

- Design custom gadgets, props, tools, toys and gift items
- Created items that use simple electronics such as night lights, LED desk light/lamps, wall art, fiber optics and more.
- Resin printing of props, game pieces and miniature statues
- Laser cut and design of Christmas ornaments, picture frames, desk signs, cutting boards – upon request on various materials.
- Engraving

Landscaping – Worker in Friend's Business ----- 2018 – 2020

- Mowed lawns, weed and debris removal, lawn re-leveling, planting seeds and pruning bushes and trees.

Organizations

Theta Chapter of the Chi Phi Fraternity

- **Philanthropy Chair** – In charge of coordinating philanthropy events and community service for the chapter.
- **Wiring Chair** – In charge of the upkeep of the house internet and servers/website.
- **Steward** – Runs in house meal-plan.
- **J-Board** – Chapter internal judicial board responsible for any bylaw changes or disputes.

Volunteer Work

Keep Rockland Beautiful – Rockland Lake, NY Participated in an event, Keep Rockland Beautiful for the National Honors Society.

His Table – Troy, NY

Help clean up after the soup kitchen closes.
